ABSTRACT

The project is an ecommerce related website. Through an e-commerce website, a business can process orders, accept payments and manage shipping. It's tough to imagine our life without e-commerce. Our website "Chk'Out" is taken as a reference of amazon, flipkart etc. It includes categories like fashion, electronics and groceries. Our website provides the products at reasonable cost

This website displays a home page.The home page consists of a slideshow of the different categories available in our website. Next there is a categories page where you can select the required category you want. There is a separate webpage for each category where you find different products. The user can add the interested items to the cart. The items are displayed in cart page. Also you can find about us page.

TECHNICAL STACK

HTML

The Hyper Text Markup Language or HTML is the standard markup language for documents designed to be displayed in a web browser.HTML elements are the building blocks of HTML pages. web browser receive HTML documents from a web server or from local storage and render the documents into multimedia web pages.HTML describes the structure of a web page semantically and originally included cues for the appearance of the document. The file should be saved with extension.html.

CSS

Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation of a document written in a markup language such as HTML or XML CSS is designed to enable the separation of content and presentation, Including layout, colors, and fonts. This separation can improve content accessibility; provide more flexibility and control in the specification of presentation characteristics; enable multiple web pages to share formatting by specifying the relevant CSS in a separate. The file should be saved with extension.css

JAVA SCRIPT

JavaScript, often abbreviated as JS, is a programming language that is one of the core technologies of the World Wide Web, alongside HTML and CSS. As of 2022, 98% of websites use JavaScript on the client side for webpage behavior, often incorporating third-party libraries. JavaScript is a high-level, often just-in-time compiled language that conforms to the ECMAScript standard. The javascript file should be saved with extension .js
